Joe Meucci, founder and COO of STG, is a BSME, MBA with more than 45 years experience in steam turbine design and the power-gen industry. His goal is to provide STG's clients with the high quality products at competitive prices.

150 KW Induction Unit

A small induction unit is used in lieu of an energy wasting pressure reducing station helping reduce a college's total energy costs.

1 MW Synchronous Unit

A 1 MW condensing unit is fueled by scrap wood helping a crate manufacturer reduce its total energy costs.

A 2 MW Brokered Sale

A slightly used 2 MW condensing unit in West Virginia finds a home in a Hawaiian biomass to energy project. Both buyer and seller were very happy.
